

# Green Communities Helping Power Your Community Energy Project

# We Provide Community Groups With Affordable Expertise For Green Energy Projects At A Local Level.

How we help start your community project

## About Green Communities

Green Communities is a unique partnership of companies founded by Royal HaskoningDHV and Forte Renewables. We offer a dedicated service combining legal, financial, engineering and planning resources to unlock and enable community renewables.

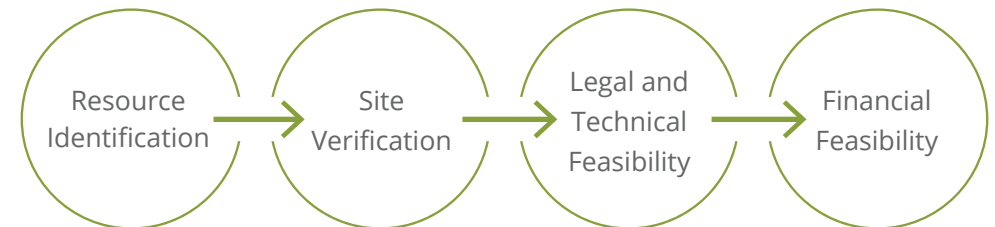

## The Challenge

Investors will require appropriate information in order to access Government funding by reaching a Financial Investment Decision (FID). The FID milestone is a significant hurdle to overcome and can swallow time and resources if not managed efficiently.

## The Green Business Plan

Green Communities offer a bespoke product, the Green Business Plan, to help you unlock funding opportunities and reach FID. The Green Business Plan will enable you to approach investors and secure funding for your energy project.

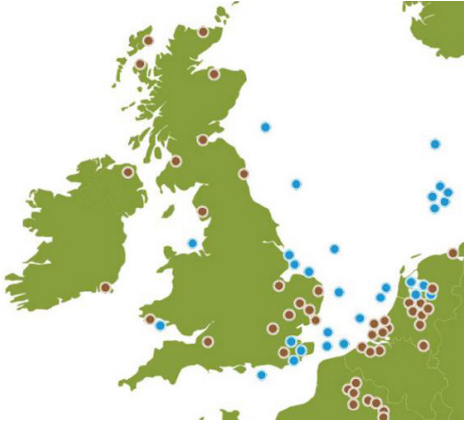

## There are four key phases to producing the Green Business Plan:

## Other Services

In addition to the Green Business Plan we can provide a whole range of other services to assist with planning, procurement, construction and operation of your project.

## Our Project Experience

## We have expertise in the following:

- Biomass
- Hydro
- Onshore and offshore wind
- Wave and Tidal Energy
- Solar
- Combined Heat and Power (CHP) Plants
- District heating
